

Carla Vasquez

33 years old

Occupation and Hobbies:

- Data Analyst
- Nature walks
- Reading up on different cultures

Bio:

- Loves finding patterns and behaviors in the numbers
- Enjoys discovering new places to eat so she can take her co-workers there after work
- Single, but goes on casual dates occasionally, much to the eventual dismay of the other person. Spends holidays with her parents and extended family

Goals:

- Get her friend Jana to share her love of exotic cuisine
- Spend a summer in Thailand
- Go back to school to do research in Data Analysis

Frustrations:

- Usually doesn't have time after work to find new restaurants
- Strangers trying to start up a conversation while she's on a walk

Devon Mayfield

25 years old

Occupation and Hobbies:

- Digital Marketing
- Marathon Running

Bio:

- His father had a heart attack scare a year ago
- Has always enjoyed working out, but is now also considering what he eats

Goals:

- Stay within his budget of \$40/month on eating out/take-out
- Find new health food restaurants to show to his mom and dad

Frustrations:

- His dad is being stubborn about changing his food habits
- Being called a "health-junkie"

Jake Delves

49 years old

Occupation:

- Senior Developer (works from home)

Bio:

- Enjoys his job, has worked for the same company for years.
- Started working from home during the pandemic, actually enjoys it more than in person

Family Life:

- Has a wife (who also works) and 2 kids: a highschool student and a preschool student
- Recently, the highschool student started failing a few classes
- Has started working through his lunch in order to finish work by 5 PM each day

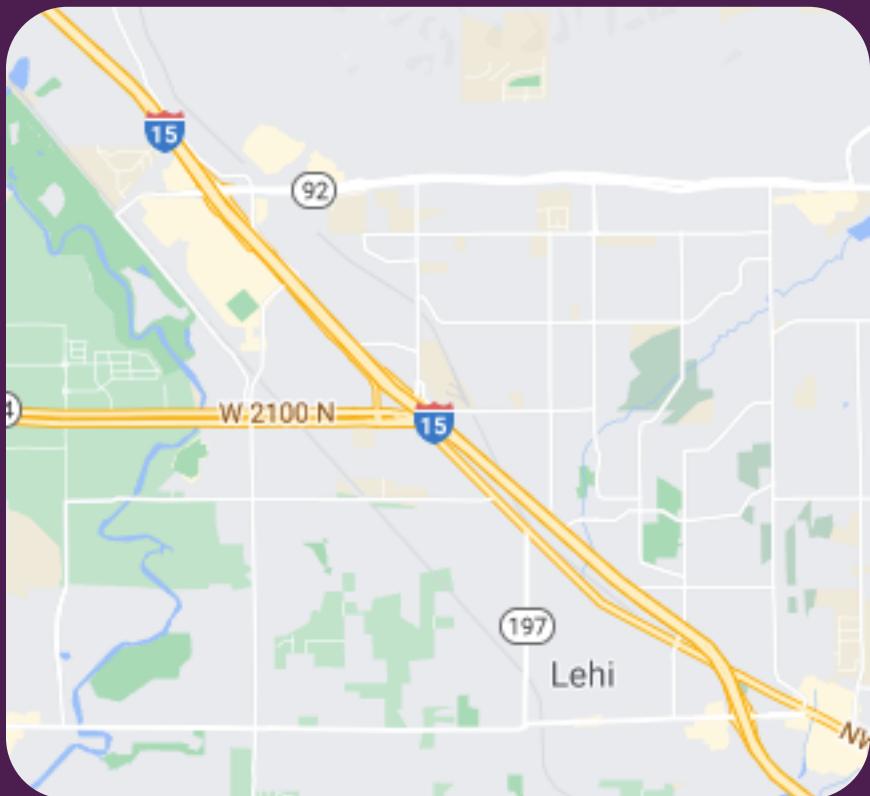

Goals:

- Teach the junior devs on his team to be more self-reliant
- Take his wife on vacation within 2 years
- Get his teenage daughter prepared for college

Frustrations:

- Not enough time to make food for lunch for himself and the preschooler

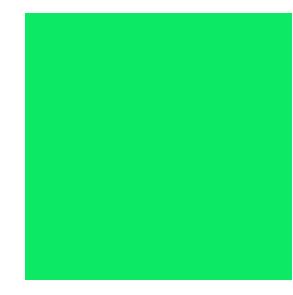

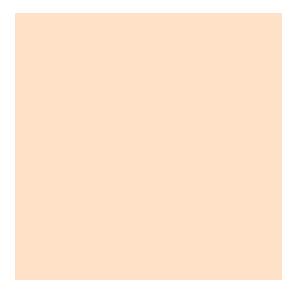

List of features

- Recommends nearby restaurants that match a majority of a user's preferences
- When searching, restaurants that the user hasn't tried yet are listed first
- Allows users to review restaurants
- Allows users to order items for delivery or pick-up
- Highlights menu items that have health benefits

User Stories (respectively)

- "I'm a picky eater. I dislike being disappointed by new food, so only give me recommendations that match my preferences."
- "I'm a self-proclaimed foodie, and proud of it! I want know what's new, so I can experience everything."
 - (This one kind of goes with the first two) "I just recently opened my restaurant. Can you have your app recommend me even if I don't match ALL of their preferences so I can get some people in the door?"
- "I'm not a picky eater, but I enjoy quality. The reviews on your app should be easy to find and read so that I can try new styles of food safely."
- "I have a flexible work schedule. Some days I need delivery, and on other days I can do take-out."
- "My restaurant has items that have health benefits. Please mark or highlight those in your app so the users who are looking for those items can find them with ease."
